

i would like for soreson to allows all to open to any vrs not just only sorensen all other than sorensen so we can use whatever we choose to use like sprint vrs, hovrs, and hamiltonvrs. also like to use only phone numbers or host name than use ip address if not a sorensen user so they need to allow unlimit use of phone or host than use the id address. hope to open to all not to limit of use vrs.

thanks
